THE SECRETARY  
CONVENTION FOR DEMOCRATIC SOUTH AFRICA.  
P.O. Box 307  
ISANDO  
1600

Dear Sir,

I'm very much happy to get this opportunity to write this letter to you Sir, as you know that at present situation people die each and every seconds that why I thank this chance to my god to save me so far. I'm also pray the same words to members and staff of Codesa for a long-live until SA has got its proper democracy.

Sir, I would like to thank for your Document that I received three weeks ago, but the disappointment is this I have found that my parcel is opened on the letter box and I don't know whether the books are all right or not. I have got the Volume 1 & 2 and the Declaration of Intent of the Signatures of the parties delegates.

Secondly, Sir I'm very much concern about the standing block of Codesa because we as Africans believing that CODESA could lead us through a proper & really Democracy. Sir, there is no way of solving our crisis without negotiation even when you are preparing for a war you must start negotiate making arrangement in order to beat your opponent. So it's too early for us as African to stand fore war against who because we are brothers and sisters, mothers and fathers of Africa. We are all born in Africa but differ in Nation because of Apartheid. So we must come down and solved this deases when is Apartheid then we are going to enjoy our country as African.

But, on and off I will blame the government when it seemed as they are not committed on solving this country's problem. The deadlock of Codesa is not on hands of ANC, AZAPO, PAN or Inkatha but on hands of South African government which have got powers and money on destroying violence in this country. I say that because day and night people died because of his money that is deducted by the state on salaries and Tax on goods.

As a Worker I always asked a question like "What's De Klerk's aims about his Campaign of Referendum on 17-March-1992? What exactly his aims. De Klerk's tell the nation that the result of the Referendum gives him on transition this country to democracy hence the white minority support changes in South Africa. So now what <sup>are</sup> they doing today he kills the people for nothing. I have members of the National Party, they are not know what going on today because they are supporting De Klerk to move forward and get a proper way of solving our Crisis.

As Workers and Engine of this country economy we are much concern about the Boipatong massacres, because it seems to us that the violence in this country is a plan by the government destabilising community to not think about Apartheid and Democracy of the Country. We are all concern about the Chamber of Mine that they involved on Boipatong killings. We are given enough production and today the very same high production killed us for nothing. Today there's deadlock on wage negotiation they refused to give us only 15% because they want that 15% for to the 1st tomorrow. Also De Klerk and DERIC KERS FINANCIAL Minister knows

that. I appeal to the government to try by all means to that they take Codesa back on operation before many things can happen. I believe the result of the UN Security meeting give them a clear light about negotiation is concern. If they are failing to take that they must give power to the people. We don't want war in this country our country is too big and nice we don't want to see such building destroy because of him staying in power doing nothing for the people. I would also appeal to them to take action on result came from

"TURN THE PAPER PLEASE"

Goldstone Commission. and starting burning all traditional weapons throughout the Country. People must have weapon to defend himself at home not on public street.

The SADF and SAP must take to prison all those carrying weapons Public. MANGOSUTHU BUTHELEZI must stopped opposing Mr Justice Goldstone on issue of Carrying Weapons public.

I appeal to the government to take into prison those who responsible for killings in Bopetong and other areas affecting violence not to relax because of that violence doesn't affect white but it only to the blacks perpetrated by Gatscha Buthelesi and his traditional weapon which cost thousand and millions of people losing their lives. Losing the one without Fathers and Mothers, the one without brothers and sisters because of his traditional weapons.

De Klerk must come out of his brother or Father when Pw Botha Vorster, Verwoed and the others, trying to get South African to be a Democratic processes not selling out through Bloodshed.

Sir, thank for your recommendation on my views and also thank your document that give me and others the information on Building our country by peace and harmony.  
Thank you so much have a long life until our country reach its true goals.

Yours faithfully  
NELSON MASINA.
